Hello everyone. My Japanese friends are very busy every day, so I decided to make a report about their study time. I asked my classmates two questions.

First, I asked, "How many hours do you study from Monday to Friday?" 10 students study for less than 1 hour. 20 students study for 2 or 3 hours. 7 students study for 4 or 5 hours, and only 3 students say that they study for more than 6 hours.

The next question is "How many hours do you study on Sundays?" 6 students study for less than 1 hour on Sundays. 18 students study for 2 or 3 hours and 11 students study for 4 or 5 hours on Sundays. There are 5 students who study for more than 6 hours on Sundays.

During the interview, I found the students who belong to a club had less time to study from Monday to Friday. It is also difficult to study on Sundays because of their club. However, they know how to use the limited time they have. I think this is important. Thank you for listening.
